EXECUTIVE SUMMARY

One firm from the board's decision to the first shift.

Ascenzi & Associates is a specialized consulting firm for semiconductor and high-technology facility construction, advanced manufacturing, and industrial development. We help foreign owners and vendors solve the three problems that stall a U.S. plant: people, capital strategy, and the paperwork of entry.

LEADERSHIP

Autie R. Ascenzi

FOUNDER & PRINCIPAL

Journeyman pipefitter and UA-certified orbital welder with field experience on advanced-node semiconductor projects. MS Construction Management, Arizona State University. Presented his prefabrication productivity research at SEMICON Taiwan.

WHAT WE DO

01 Talent

The biggest risk on a plant build isn't the drawings — it's the people.

Skilled trades recruiting · site leadership search · training pathways with universities · expat and local headcount, pay and visa design · labor and community liaison.

02 Investment strategy

The roadmap is finished before the first dollar of capex moves.

Market entry and site selection · entity structure and the E-2 pathway · offsite and modular delivery strategy · owner representation · supply chain footprint.

03 Landing

Every visa and every errand of inbound investment, in one place.

E-2, L-1 and B-1 visas · entity formation, banking, payroll and tax · contractor licensing, permits and inspections · insurance and bonding · relocation and government liaison.

THE ROAD IN

**It's a long road into the U.S. We walk every mile of it
with you.**
